

ELECTRICAL TESTING

Power Systems & Controls understands “Power” and we welcome the opportunity to visit your facility to discuss your testing needs. As a manufacturer of “Power Quality Products”, we know firsthand what anomalies can occur in today’s power backbones and we can prevent them from creating serious and damaging problems.

Our Field Service Division is staffed with Engineers and Technicians with expertise in the areas of excellence including, but not limited to, the following:

- Grounding Assessments
- Third Party Tester
- Insulation Resistance Testing
- Emergency System Testing
- Megger Testing
- Full Outage Testing
- Load Bank Testing
- Primary & Secondary Injection Testing
- Blackout Coordination Test
- Medium & Low Voltage Testing
- Circuit Breaker Testing
- Electronic Control Testing
- Burn-In Testing
- Battery Testing
- RFI/EMI Testing
- Acoustical Testing
