

POWER SYSTEMS & CONTROLS

THE POWER IS ON!

SENIOR ELECTRICAL ENGINEER

JOB DESCRIPTION:

Richmond based Manufacturer looking for Sr. Electrical Engineers to design electrical systems for power path, controls, and power distribution. A strong understanding of controls, both digital and analog are required for application and design.

REQUIREMENTS:

- Must be a U.S. citizen
- B.S.E.E. required
- Candidate must have 10 years of experience designing electrical systems
- Must be hard working, self driven and able to think "outside the box"
- Experience in design of control systems for Power Converters and distribution equipment is a plus
- Proficient in the operation of the latest version of AutoCAD design software
- AutoCAD Electrical is mandatory
- Technically proficient with the ability to multi-task and follow instructions
- Posses strong written and oral communication skills
- Solid working knowledge of regulatory requirements for electrical systems and product development
- Experience with electromechanical systems integration

RESPONSIBILITIES:

- Support the Electrical Engineers to design electrical systems related to the power industry
- Implement procedures, specification sheets, electrical drawings, and bill of materials
- Generate ideas and solutions for new products, as well as engineering support for current products
- Comply with regulatory requirements and company design control procedures
- Provide engineering support to manufacturing and operations
- Assist in document control and maintenance of design files
- Work closely with Project Management from order entry to product shipment
- Complete timelines in accordance with a published schedule
- Attend project meetings to keep schedule(s) on track
- Work with the Development Team to ensure PS&C's best practices are properly implemented on newly developed products
